**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Kandefer et al. (5,153,913).

As to claim 1, Kandefer teaches a system for generating speech; comprising:

A large library for storing, coarticulated speech segments/waveforms having multiple sounds for a diphone to reflect the associated different co-articulation (prosody) (Col.5, lines 25-30) where the speech waveforms are designated using diphones; and

Means for selecting the waveforms from the library according to the diphones and where the selected coarticulated speech segments are concatenated in the selected sequence to generate the speech (figs.1-6; Col.3, lines 35-42).

***Allowable Subject Matter***

Claims 3-7 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: the claims are allowed because Kandefer doesn't teach the waveform selector as recited in the claims.

Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
